. Description of changes since the previous time the course was given.

Description of changes since the previous time the course was given.

No, idea, this is the first time I give the course. I would assume I focus more on exercises and computer labs than the previous teacher did.

. What are the course's strong points according to the students (summary based on the numerical results as well as their free text answers)

What are the course's strong points according to the students (summary based on the numerical results as well as their free text answers)

I have not received the questionnaire from the students, so I do not know.

. What are the course's weak points according to the students (summary based on the numerical results as well as their free text answers)

What are the course's weak points according to the students (summary based on the numerical results as well as their free text answers)

I have not received the questionnaire from the students, so I do not know.

. The teacher's analysis of the course

The teacher's analysis of the course

I think that the course content is fine, but the widely differing background of the students require me to start with a repeat of the AS7006 course which then leaves less time for actual course material. The course requires more and better exercises and computer labs. I will develop these for the next time (in 2020). The course would also benefit from new lecture notes, but that is a major undertaking and the current notes are still adequate.

The students were generally motivated and did the work required of them

. Conclusions as well as suggestions for improvements
